Dimensions

Boots / **Helmets** / **Gloves***	60	70	80	90
Length (cm)	265	300	335	370

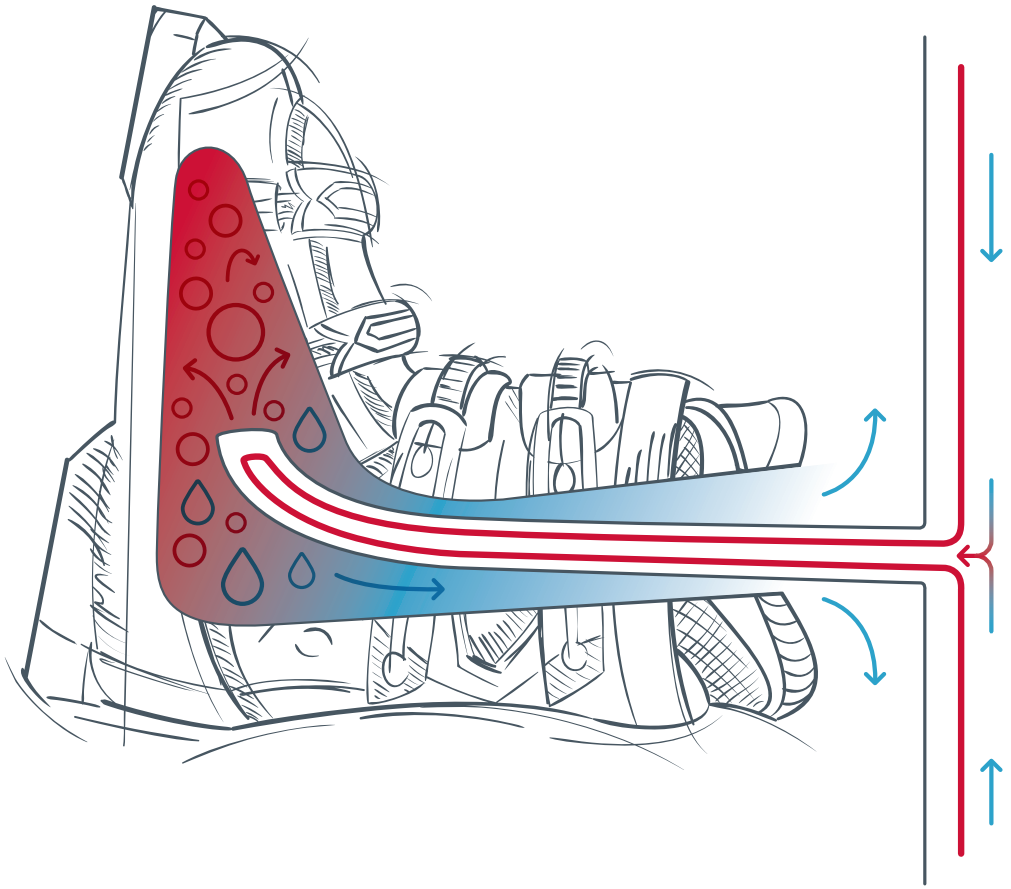
Width 95 cm / Height 240 cm / Other dimensions on request
* Capacity specifications in pairs

BOOT DRYING TECHNOLOGY
NOISE- AND ODOURLESS SHOE WARMING

The newest generation of boot-drying technology uses heating cables to warm the boots - with no noise and no odours. A warm ski boot allows more precise fitting and the improved fit will leave your guests feeling comfortable and happy.

DRYING / DEODORISATION

- **Drying by means of ventilation**, energy-saving 8 Watts for 2 person locker
- **Cosy warm boots & gloves** with only 75 Watts for 2 person locker
- **Warm air 220V/3kW/16Amp** – no 400V connection necessary
- Boots are warmed with no noise or odour by a **combination of heating cables and ventilation**
- **Unique double channel system** ensures perfect air flow & circulation
- **Spray-based deodorisation**
- **Service and monitoring** by means of an external PC network possible
- **The integrated drip pan** protects the boots below from moisture
- **Easy to clean and care for**



HIKE & BIKE
SKI DEPOT SUMMER USE

- Whether we're talking about **dirty hiking boots or biking shoes**, sweaty sports jackets or damp backpacks, who wants things like that in their noble hotel room?
- The **drying cabinet adapted for summer use** gives those items a home and dries them. The dirt is not tracked through the whole building, so the room is ready for you to enjoy it and relax.
- Everything in a **living room-like atmosphere** – in line with hotel standards

The development of our drying cabinets was focused from the very beginning on year-round use. The need for and comfort of dry shoes and boots and warm clothing are not over at the end of the skiing season.
